Sound and Intonation:

- Perfect intonation with bright sound and strong resonance
- Bars made of high grade steel - specially processed, and available with either matt or chrome plated finish. High gloss finish on demand.
- Tonal range of the model **concert** 3 octaves
- Tonal range of the model **professional** 2.7 octaves, which can be extended up to 3 octaves later
- Tuning from 440 to 446 Hz without extra charges

Damping and Resonators:

- Damping travel and damping characteristics can be adjusted easily to individual requirements
- Model **concert** is equipped with an additional device to isolate the damping mechanism
- Resonators made of lightweight aluminium for quick and easy assembly
- Lifelong, reliable and consistent damping over the complete tonal range thanks to special joints at each side of frame and dual damping rods

- The compact model **RKS/K/P 300** (mounted in a case) is equipped with an easily adjusted foot pedal damper connected using a flexible Bowden cable.

Construction and Frame:

- Easy height adjustment from 73 - 95 cm
- Hard case cover - made of solid wood - for best protection of the **concert** series
- Easy and quick setup of the whole instrument
- Minimum height 73 cm for prompt transportation of the complete instrument

Further features:

- Cord guides, with rubber supporting pins for comfortable playing
- All instruments delivered with cover (flexible or hard case) and mallets
- 4 years extended guarantee after registration

GLOCKENSPIEL professional

The *professional* models are available with stand or comes as a compact model in a case with 2.7 octaves range. Both instruments have a brilliant sound and strong implementation. The model **RGP 3030** can be extended up to 3 octaves later and permits adjustment of damping travel and damping

characteristics to suit individual requirements. An easy to adjust moveable foot-pedal with a flexible Bowden cable permits damping in various set-ups with model **RGS/K/P 300**. Furthermore, this instrument is equipped with an additional device to isolate the damping mechanism.
